Type C RV installation

Energy saving and fuel saving

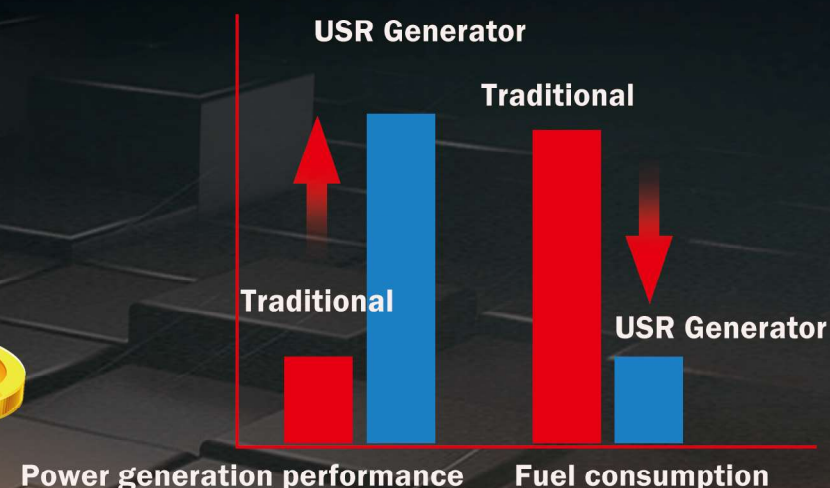

Highly intelligent

Energy efficient Smart throttle is more fuel efficient

Intelligent throttle, which can automatically adjust the speed according to the actual load change, making its fuel consumption 20%-40% lower than ordinary units, longer running time, and economical

Multi-function protection for overload, short circuit, lack of oil, lack of gasoline and temperature, etc., highly intelligent and reliable in operation.

Multifunctional protection Reliable and guaranteed

Highly intelligent

Long time running

Convenient operation, no need to move, remote panel control in the car, one-key remote control within 30 meters to start shutdown

You can see the amount of fuel at a glance, so you don't have to worry about when you need to refuel! The standard 20L large-capacity fuel tank can last for 20 to 30 hours with air conditioning.

Different specifications of fuel tanks can be customized according to the space of the customer's RV
